

US Army Corps  
of Engineers®

MILITARY

U.S. ARMY  
COMMAND AND  
GENERAL STAFF COLLEGE

The Corps supports the nation's military in peace and wartime, both in the U.S. and overseas. The Corps designs and manages construction of homes, schools, hospitals, day care centers, office buildings, airfields, and training ranges for military members and their families. In addition to Military construction, the Corps provides environmental restoration programs by removing hazardous materials, unsafe buildings, ordnances and debris from active and former military installations.

## Permanent Full Time Positions & Summer Internships Available

In addition, the Corps of Engineers offers full time students the opportunity to participate in the Student Career Experience Program (SCEP). This is a planned and progressive educational program that offers opportunity from high school graduation through graduate study. The SCEP is also known as the cooperative education or co-op program. The program is a partnership among the student, the school, and the Corps. It combines academic classroom learning with practical on-the-job experience that provides students with paid work experience that provides students with paid work experience in their fields of study. Upon successful completion of all work experience and degree requirements, students are eligible for a non-competitive conversion to a permanent position with the Corps of Engineers within 120 calendar days of graduation or program completion. Similar to a full time position, SCEP students earn paid holidays, vacation, and sick leave, and are eligible for health and life insurance coverage, retirement and investment plans, and some training and tuition assistance.
